

# HorizonID

Built on Experience, Designed for What's Next

Many organizations rely on mature legacy identity governance platforms. Transitioning to a modern identity platform like the **Microsoft Entra Suite** can be complex – requiring a clear strategy, the right tools, and confidence in execution.

MajorKey leverages its powerful extension solution, **HorizonID**, to align with your unique business requirements as you transform.

HorizonID is designed to enhance Microsoft Entra ID Governance by enabling a smooth transition of complex, custom line-of-business integrations, helping you fully unlock the value of your Microsoft Entra investment.

## HorizonID solves identity challenges

HorizonID is built on Azure foundations and enhanced with unique logic, workbooks, and AI. It solves real-world identity challenges by extending Microsoft Entra Suite. From legacy integrations, to complex workflows, to conflicting data across sources, HorizonID helps remove roadblocks and simplify migrations.

## Get started with a custom workshop

Discover clear, practical solutions to solve your organization's identity and access challenges. We focus on real-world outcomes, tailoring content to meet the specific needs of your industry. Through custom scenarios, you'll see how HorizonID extends Microsoft Entra Suite to simplify processes, enhance oversight, and tighten security.

## HorizonID's Key Capabilities

- Advanced import from multiple systems
- Precedence rules and transformations
- Duplicate prevention and reserved identifier handling (rehires)
- Exchange mailbox and home directory management
- Smart role mining with Security Copilot
- Identity signal exports to Microsoft Sentinel/Log Analytics
- Unified view via the cloud metaverse and custom reporting for governance and access reviews

## About MajorKey Technologies

MajorKey is a Microsoft Elite Partner with over 25 years of experience solving complex identity challenges. Our expertise lies in solving the unique challenges organizations face, whether it's integrating with legacy applications or solving complex workflows. As a global launch partner for several Microsoft Entra workloads, we bring proven expertise, close collaboration with Microsoft product groups, and trusted delivery scale.

Our advisory-first approach combines discovery, analysis, and roadmap creation to ensure your migration reduces friction, enhances security, and unlocks the full value of Microsoft Entra.

## Solve Critical Identity Challenges with Speed, Flexibility, and Intelligence

Identity onboarding from disparate systems

Modernizing legacy identity workflows

Role optimization with AI-powered insights

Managing complex rehire and reserved value scenarios

Visibility and governance for compliance
