MajorKey

MajorKey is offering Atlassian Cloud Migration Service Bundles to simplify the migration of the core and basic data of your Jira and Confluence instances. With server licensing being de-commissioned in February 2024, now is the time to get started with the move to Atlassian's hosted solution!

These Service Bundles enable you to quickly move to the cloud using Atlassian's provided migration technology, which migrates 70-90% of your data , enabling you to start using the Atlassian cloud platform quickly. MajorKey will advise you on accessing, securing, and migrating the remaining data, and develop a project roadmap and integrations based on your needs.

Each of the MajorKey Cloud migration bundles include the following services:

1. An assessment and deliverable of your current state, cloud migration roadmap, and timeline with core Jira and Confluence data.
2. Jira and Confluence cloud migration including remediation and troubleshooting of errors
3. Post live support after final migration completion

	Essential	**Professional**	**Enterprise**
Atlassian apps supported	Jira + Confluence	Jira + Confluence	Jira + Confluence
Licensed users	1-100	100-500	500-1,000
Marketplace apps supported	0	1-3	2-4

Additionally, optional add-on services can include: :

1. An expansion of the initial assessment to include configurations, employee experience, workflows, third party integrations and apps aligned to your business goals and objectives.
2. Supervised user acceptance testing of Atlassian cloud prior to go live
3. Administrator and end user training to prepare end user staff for the Atlassian cloud
4. Overnight or weekend production migration cutover
5. Inclusion of marketplace apps in the data migration
6. Hypercare and managed services

Delivering on Client Success

After a cloud migration, MajorKey clients report that "complex application upgrades and infrastructure maintenance is a thing of the past, allowing them to dedicate more time in improving the lives of their customers and increasing business efficiency." By relying on the insurances of Atlassian's investment in reliability and security, the average Atlassian administrator can spend more time where it matters.

Due to MajorKey's exceptional customer-centric approach for Atlassian cloud migrations, we were elected the first of two partners in the entire Atlassian ecosystem to receive a designation specialization for performing these types of projects by Atlassian and have successfully migrated over 100 clients to the Atlassian Cloud.

How to Get Started

Get started on your migration journey today and receive enhanced security, easier management, and improved reliability. In addition, Atlassian's cloud platform includes more features and functionality than traditional server licenses.

Not finding a bundle that fits your needs. MajorKey offers tailored migration packages to meet the unique needs of your business.
